

## COURSE OUTLINE

### (1) GENERAL

<b>SCHOOL</b>	Engineering		
<b>DEPARTMENT</b>	Electrical and Computer Engineering		
<b>LEVEL OF STUDY</b>	Undergraduate		
<b>COURSE UNIT CODE</b>	3.004	<b>SEMESTER</b>	3 <sup>rd</sup>
<b>COURSE TITLE</b>	ELECTRONICS I		
<b>COURSEWORK BREAKDOWN</b>		<b>TEACHING WEEKLY HOURS</b>	<b>ECTS Credits</b>
Theory (Lectures)		3	3.6
Tutorial/Exercises		1	1.2
Laboratory		1	1.2
<b>TOTAL</b>		<b>5</b>	<b>6</b>
<b>COURSE UNIT TYPE</b>	Specialized general knowledge/Skills development		
<b>PREREQUISITES</b>	General High School Knowledge in Physics, Electrical Circuits I.		
<b>LANGUAGE OF INSTRUCTION/EXAMS</b>	Greek (Teaching, Exams) English (Exams) French (Exams)		
<b>COURSE DELIVERED TO ERASMUS STUDENTS</b>	YES		
<b>WEB PAGE (URL)</b>	<a href="https://eclass.hmu.gr/courses/ECE120/">https://eclass.hmu.gr/courses/ECE120/</a>		

### (2) LEARNING OUTCOMES

<b>Learning Outcomes</b>
<ol style="list-style-type: none"> <li>1. Knowledge of p-n junction based on semiconductor theory.</li> <li>2. Knowledge of diodes principles (Silicon, Germanium, Zener diode) and their applications in electrical circuits.</li> <li>3. DC and AC analysis of bipolar junction transistors (basic equations, equivalent circuits). Skills in designing signal amplifiers.</li> <li>4. Monopolar transistor (FET) (basic equations, equivalent circuits, dc and ac analysis). Skills in designing signal amplifiers.</li> <li>5. Ability to understanding and analysing (in theory and in laboratory) amplifiers with bipolar (BJT) and monopolar (FET) transistors. Skills in designing single stage amplifiers in analog and integrated circuits.</li> </ol>
<b>General Skills</b>
<ul style="list-style-type: none"> <li>• Search, analysis and synthesis of data and information, using the necessary technologies</li> <li>• Decision making</li> <li>• Project design and management</li> <li>• Autonomous work</li> <li>• Teamwork</li> <li>• Exercise criticism and self-criticism</li> <li>• Promoting liberal, creative and inductive/deductive thinking</li> </ul>

### (3) SYLLABUS

#### **SYLLABUS**

The p-n diode and basic semiconductor theory. Electrical equivalent diode circuits. Basic circuits with p-n and Zener diodes. AC to DC conversion circuits through rectifier circuits. Structure and operating principles of the BJT bipolar transistor: DC polarization, I-V output curves, circuit operating point, basic amplification principles, basic BJT circuits (common emitter, common collector, switch). FETs, field-effect transistors: DC polarization. Analysis and design of basic amplifier devices of bipolar transistors and FET transistors using equivalent small signal circuit models. Understanding of the techniques and procedures to build integrated circuits.

#### **LABORATORY with 5 Exercises**

1. I-V curves of p-n and Zener diode
2. Useful diode circuits
3. Simple DC Power Supply (Rectifiers - Smoothing Filters).
4. BJT transistor. DC Polarization and amplification (Common Emitter, Common Collector).
5. FET transistor. DC Polarization and switching operation

### (4) TEACHING METHODS - ASSESSMENT

<b>MODE OF DELIVERY</b>	In-Class Face-to-Face	
<b>USE OF INFORMATION AND COMMUNICATION TECHNOLOGY</b>	<ul style="list-style-type: none"> <li>• Use of ICTs in lecturing</li> <li>• Use of ICTs in laboratory exercises.</li> <li>• Use of ICTs for the communication with students via the e-class platform</li> </ul>	
<b>TEACHING ORGANIZATION</b>	<b>Method description/Activity</b>	<b>Semester Workload</b>
	Lectures	39
	Laboratory Exercise	26
	Tutorials	13
	Project (journal/paper reading and theoretical study)	26
	Exams	39
	<b>Total Contact Hours</b>	<b>150</b>
<b>ASSESSMENT METHODS</b>	<p><u>Evaluation process</u></p> <ol style="list-style-type: none"> <li>1. Written examination 180 minutes (70%)</li> <li>2. Laboratory performance (20%)</li> <li>3. Public presentation (10%)</li> </ol> <p><u>Language of Evaluation: Greek</u></p> <p><u>Evaluation Methods</u></p> <ol style="list-style-type: none"> <li>1. Written Examination with Extended Answer Questions</li> <li>2. Written Assignment</li> <li>3. Oral Examination</li> <li>4. Written Examination with Problem Solving</li> <li>5. Laboratory Work</li> </ol>	

### (5) RECOMMENDED BIBLIOGRAPHY

1. Electronic Principles, 8th Edition, Malvino A. P., Bates D. J., Publication Tziola, 2016 ISBN 960-418-559-4 (in Greek)
2. Microelectronic Circuits, 7th Edition & CD, A. Sedra, K. Smith, Publication Papatotiriou, 2017, ISBN 960-491-107-3 (in Greek).
- 3 Electronic Devices and Circuits Theory R. Boylestad and L. Nashelsky Prentice-Hall ISBN 0-13-249517-1
